Hospitals

The Food Industry

Chemical Plants

Textile Mills

Paper Industries

Government Facilities

Wallpaper and
Floorcoverings

Animal By-products

Rubber and Synthetics

H.M. Prisons

Soap and Detergent
Manufacturers

Heritage Engineering

We have carried out Heritage Engineering projects for leading museums and organisations in the country, such as Museum of Science & Industry, Manchester, Liverpool Industrial Museum, Bradford Industrial Museum, Kew Bridge, London and Beamish. Work has included restoring and installing:

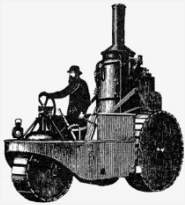

- ▶ Steam Engines
- ▶ Heavy Victorian Machinery
- ▶ Hydraulic Equipment

Architectural Metalwork

Architectural Metalwork has become very popular in recent few years, and our skills in traditional fabrication have led to a variety of commercial commissions. Old riveted steelwork, brass fittings, Victorian styling can't be found in shops, but it can be produced by people with knowledge of the industry, and that's where we can design and produce items of all shapes, sizes and finishes.

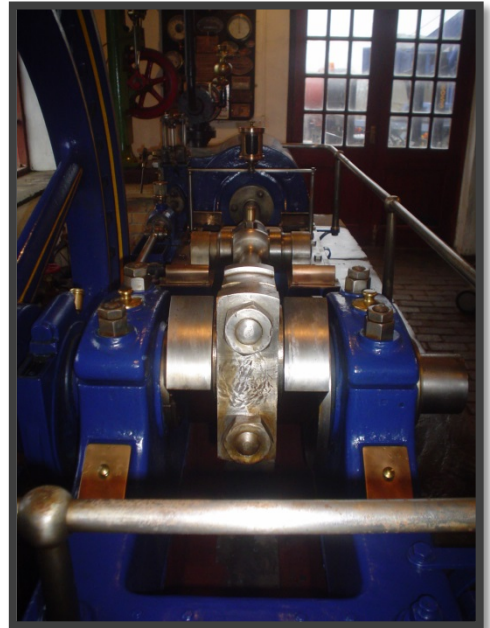

"I am pleased to report that McEwen Boilermaker's carried out the entire contract safely, keeping within timescale and budget. McEwen's approach to their work is extremely professional and I would recommend them unreservedly."
